Instructions Sheet
(Inside Front Cover)

Racking Checks

- Location:

Adequate general lighting.

Floor area clear of obstacles and suitable for movement of mechanical handling equipment.
- Structure:

Uprights not damaged, twisted or loose.

Baseplates / floor fixings securely fixed.

Beams level and undamaged.

Beams secure within the upright and suspended on one connector only.

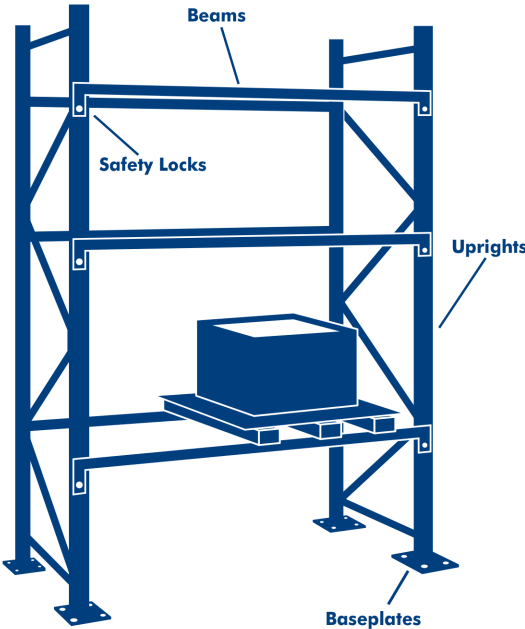

Beam connectors / safety locks in position.

Welds undamaged.
- Loading:

Pallets correctly positioned, with well centred load and in good condition.

Heaviest loads positioned at low levels where possible.

SWL (safe working load) sign clearly displayed.

NEVER CLIMB ON RACKING!

- Green Risk:

Suitable for use but to be monitored
- Orange Risk:

Substandard - offload rack as soon as possible but not longer than 4 weeks
- Red Risk:

Severely substandard - offload rack immediately. Do not use until repaired
